

AMENDMENTS TO THE SPECIFICATION

Please replace page 10, lines 2-10 with the following paragraph rewritten in amendment format:

A flexible diaphragm member 3d, defines a sealed chamber to/from which fluid is charged/discharged to vary the sectional area of the air passage 3b, is provided in the air passage 3b. In the present embodiment, the engine cooling water supplied from the heater 5 is charged to the sealed chamber defined by the flexible diaphragm member 3d to expand the flexible diaphragm member 3d, and the engine cooling water in the sealed chamber defined by the flexible diaphragm member 3d is discharged toward an engine to deflate the flexible diaphragm member 3d.
